

Northern Steeplejacks (Edinburgh) Limited

Environmental Policy Statement

January 2019

ENVIRONMENTAL POLICY STATEMENT

As a company we endeavour to carry out all our operations in a clean, energy efficient and environmentally friendly manner.

It is our policy to re-cycle all materials where it is possible to do so; this includes aluminium, paint, stone, bricks, slates, etc.

Where materials have come to the end of their useful life, and recycling is not an option; these materials are disposed of in the correct manner, in accordance with current legislation and/or local guidelines.

All hazardous waste arising from our work, such as deposits from chimneys, is disposed of through specialist waste disposal agencies.

We ensure that our workforce is made fully aware of the company's environmental policy and all employees are encouraged to be pro-active in their approach to environmental matters.

Signed.....

.....Operations Director

Date...8th January 2019.....

Northern Steeplejacks (Edinburgh) Limited will comply with the requirement of current environmental legislation and approved codes of practice.

The Company will train employees with regard to the Policy and will strive to adopt the highest environmental standards from suppliers and sub contractors.

Operations Director

Les Neil has overall responsibility for implementation of the Company's environmental policy.

Implementation of Policy

The Operations Director, General Foreman, Steeplejack Foreman and Contracts Manager have responsibility to ensure that the Company's environmental policy is brought to the attention of all employees and that the requirements of the Policy are complied with wherever the Company operates.

Employees

All employees are expected to comply with the Environmental Policy.

Solid Waste

Solid waste shall be reduced, re-used or re-cycled. When re-use or re-cycling is not feasible, solid waste shall be disposed of in the most environmentally responsible manner commercially available in accordance with:

- *The Control of Pollution (Amendment) Act 1989.*
- *The Controlled Waste (Registration of Carriers and Seizure of Vehicles) Regulation 1991.*
- *The Waste Management Licensing Regulations 1994.*
- *The Special Waste Regulations 1996.*

Control of Noise

Whenever possible, attempts should be made to eliminate noise.

If elimination of noise is not possible, noise levels should be reduced by making sure that the exhausts of compressors, generators and other plant are directed away from the sensitive areas.

Breakers should be fitted with mufflers. Compressors and generators should run with the covers closed and silencers should be maintained on mobile plant.

All equipment should be regularly maintained to prevent noise from loose bearings and leaky compressed air hoses and joints.

Emissions to Air

Where activities require statutory registration i.e. asbestos removal, will be undertaken by suitably qualified and registered sub contractors.

Fires will not be used to dispose of waste unless specifically authorised by the local enforcing authority. Any airborne material e.g. dust, smoke, vapour etc, will be minimised to prevent secondary pollution of land or water.

Hazardous Substances

The use of hazardous substances shall be regularly reviewed for need and monitored to ensure that toxicity and volume are minimised.

Hazardous substances, including wastes, shall be handled and disposed of in accordance with the best prevailing industry practice.

Liquid Waste

Liquid waste shall not be discharged in a manner that adversely impacts the ground, water or air.

Transport

Minimise the environmental impact of logistics, whether owned or sub contracted taking into account such factors as mode of transport, vehicle efficiency, fuel type, driving style and journey planning.

Audit/Monitoring

Audit/inspections will be carried out by Peninsula Business Services Ltd, Riverside, New Bailey Street, Manchester, M3 5PB during their regular Health and Safety Audits.
